

Create a star schema by creating relationships between the Sales, Calendar, Customer, Product and Territories tables

- Connect all three product tables (Product, Subcategory, Category) in a snowflake schema
- Use the matrix visual to confirm that you can filter Order Quantity values using fields from each dimension table.

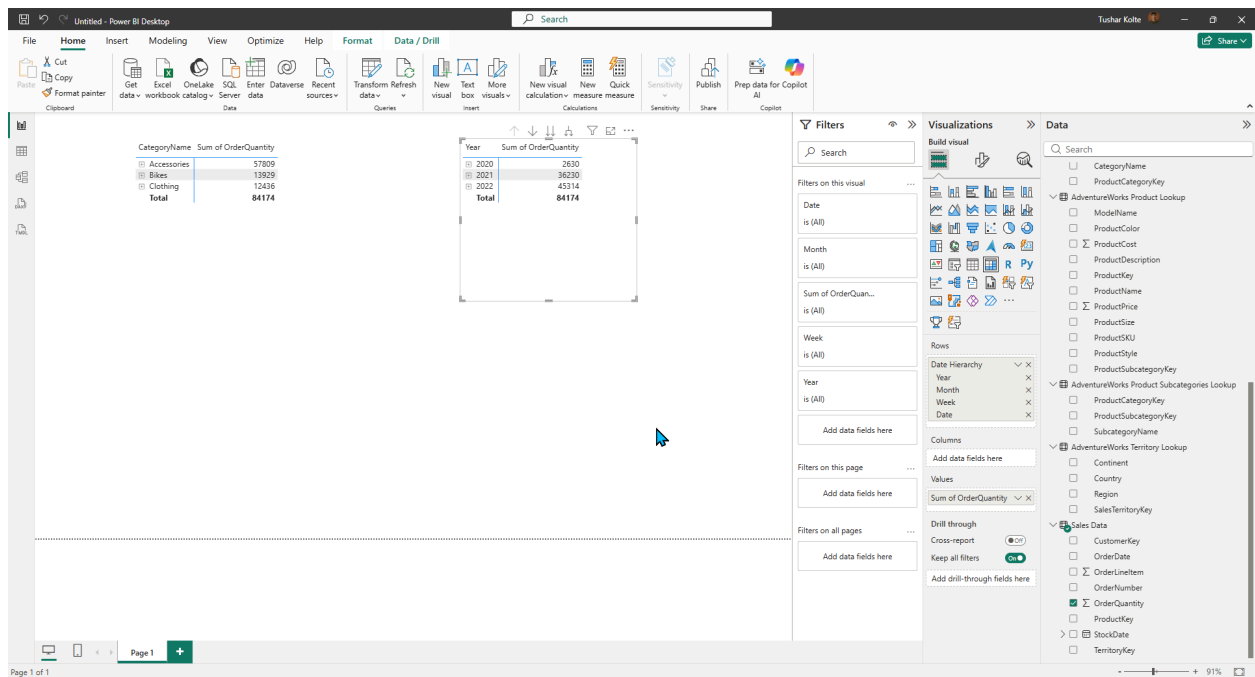

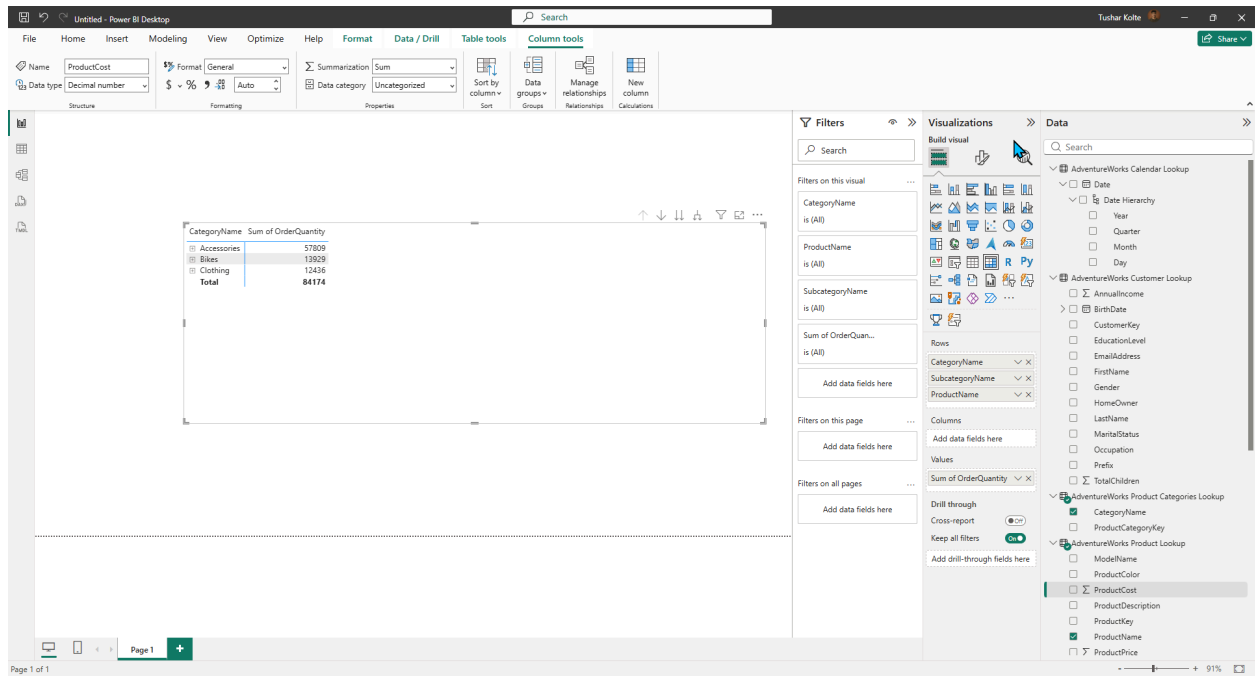

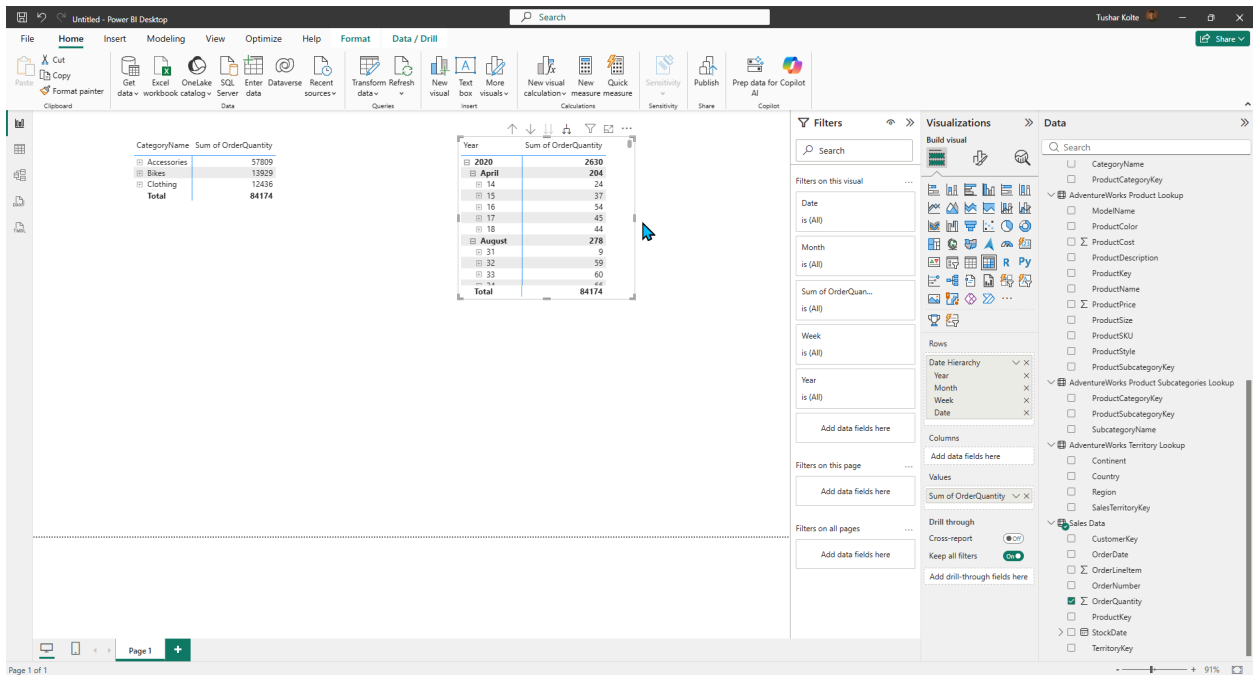

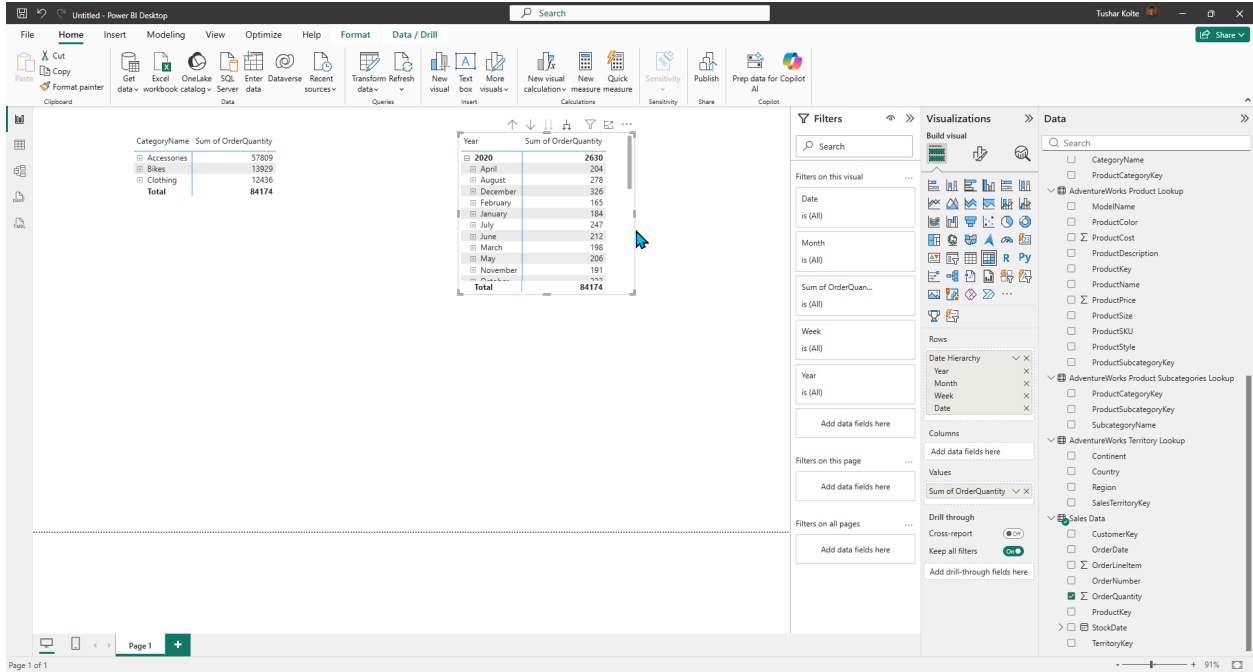

Creating Hierarchies

• Create a new hierarchy based on the Start of Year field, and name it “Date Hierarchy”
 Right-click or drag to add fields until your hierarchy contains the following (in this order):

- Start of Year
- Start of Month
- Start of Week
- Date
- Add your new hierarchy to the matrix visual (on rows) and practice drilling up and down between each level of granularity

Microsoft Power BI Desktop interface showing a report with two tables and a sidebar with filters and data fields.

CategoryName Sum of OrderQuantity

CategoryName	Sum of OrderQuantity
Accessories	57809
Bikes	13929
Clothing	12436
Total	84174

Month Sum of OrderQuantity

Month	Sum of OrderQuantity
April	8174
August	6236
December	8249
February	7260
January	7446
July	2201
June	8784
March	7791
May	8734
November	6523
October	6610
Total	84174

Filters

- Filters on this visual: Date is (All), Month is (All), Sum of OrderQuantity is (All), Week is (All), Year is (All)
- Filters on this page: Add data fields here
- Filters on all pages: Add data fields here

Visualizations

- Build visual: Add data fields here
- Columns: Add data fields here
- Values: Sum of OrderQuantity
- Drill through: Cross-report, Keep all filters, Add drill-through fields here
