Create SQL Database Server

Microsoft

Server details

Enter required settings for this server, including providing a name and location. This server will be created in the same subscription and resource group as your database.

Server name *
Impracticalserver
.database.windows.net

Location *
(Asia Pacific) Central India

Authentication

Azure Active Directory (Azure AD) is now Microsoft Entra ID. [Learn more](#)

Select your preferred authentication methods for accessing this server. We recommend using only Microsoft Entra authentication. [Learn more](#) or using an existing Microsoft Entra user, group, or application as Microsoft Entra admin. [Learn more](#)

Authentication method
☒ Use Microsoft Entra-only authentication
☐ Use both SQL and Microsoft Entra authentication
☐ Use SQL authentication

Set Microsoft Entra admin
koffetushar@outlook.com
Admin Object/App ID: c4d9e794-fb23-4cb7-a73e-2df03efc3f4a
[Set admin](#)

OK

Create SQL Database

Basics Review + create

Create a free Azure SQL Database. To customize settings, select Advanced configuration below.

Free offer applied! You get 100,000 vCore seconds, 32GB of data, and 32GB of backup storage free per month for the lifetime of your subscription. [Learn more](#)

To remove the offer, select Advanced configuration. [Advanced configuration](#)

Project details

Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Subscription *
Azure for Students

Resource Group *
(New) db-lms
[Create new](#)

Database details

Enter database name and select a logical server.

Database name *
practice-lms

Server *
(new) Impracticalserver (Central India)
[Create new](#)

Cost summary

SQL

Compute \$0.00
vCore second * \$0.00

Storage \$0.00
Cost per GB \$0.00
Max storage selected (in GB) 32

Overage billing Disabled
There will be no charges for usage within the free limits. The database will be paused automatically when the free limits are reached.

Estimated total Free *

Prices reflect an estimate only. View Azure pricing calculator [2]
Free charges will appear in your local currency in cost analysis and billing views.
* Serverless databases are billed in vCore seconds based on a combination of CPU and memory utilization. Learn more about serverless billing [2]

Review + create

Give feedback

2. Connect to the newly created **Azure SQL Database** using SQL Server Management Studio (SSMS)
3. Write a SQL query to create, insert, select, update and delete, truncate and drop in SSMS.
4. Create an index on a table to improve query performance

Visual Studio Code interface showing a SQL query execution in the SQL Query Editor. The query is:

```
1 DELETE FROM Employees
2 WHERE EmpID = 5;
```

The query was executed successfully, resulting in 1 row affected. The completion time was 2026-04-07T12:09:48.8102264+05:30.

The Object Explorer on the left shows the database structure, including the Employees table. The right sidebar displays the GitHub Copilot Chat interface, which is currently showing a "New Thread" button and a "Copilot Chat" header.

Visual Studio Code interface showing a SQL query execution in the SQL Query Editor. The query is:

```
1 CREATE NONCLUSTERED INDEX idx_lastname
2 ON Employees(FIRSTNAME);
```

The query was executed successfully, resulting in 0 rows affected. The completion time was 2026-04-07T12:15:59.0719607+05:30.

The Object Explorer on the left shows the database structure, including the Employees table. The right sidebar displays the GitHub Copilot Chat interface, which is currently showing a "New Thread" button and a "Copilot Chat" header.

5. Use SQL Server Management Studio (SSMS) to export data from your database to a .bacpac file.
