

- Create queries to connect to all .csv files in the folder into power query
- Confirm that column headers have been promoted and that all data types are correct
- Add a new column to extract all characters before the dash ("-"") in the Product SKU column, and name it "SKU Type"
- Update the SKU Type calculation above to return all characters before second dash
- Replace zeros (0) in the Product Style column with "NA"

a) Implement text transformations

- Duplicate the email address column and name it “Domain Name”
- In the new column, remove all text/characters except for the domain name
- Use transformation steps to clean up and capitalize the domain names (i.e. “Adventure Works”)
